

**TRAINING TITLE**

**REFINING PROCESSES AND PETROLEUM PRODUCTS**

**TRAINING DURATION**

5 days

**TRAINING VENUE AND DATES**

REF RT011	Refining Processes and Petroleum Products	5 days	04-08 March	\$5,500	Dubai UAE
--------------	--	--------	-------------	---------	-----------

**In any of the 5 star hotel. Exact venue will be informed later.**

**TRAINING FEES**

**5,500 US\$** per participant includes Training Materials/Handouts, Tea/Coffee breaks, Refreshments and International Buffet Lunch.

**TRAINING CERTIFICATE**

**DEFINE** Management Consultancy & Training Certificate of course completion will be issued to all attendees.

**TRAINING INTRODUCTION**

The training focuses on the core refining processes of fluid catalytic cracking, alkylation, hydrotreating, hydrocracking, and catalytic reforming, although all major processes are covered in detail. The speakers will discuss feedstock properties, process chemistry, process variables, operating conditions, unit configuration, and refinery products. The interaction between yields, operating variables, and product variables will also be covered. In addition, the basic economics associated with petroleum refining and the impact of recent environmental regulations will be discussed. These program sessions will be presented by petroleum industry professionals who have extensive experience in all of the major processing areas in petroleum refining.

**TRAINING OBJECTIVES**

Upon completion of this course, participants will have an understanding of the overall process operation of an integrated petroleum refinery and the extensive vocabulary unique to this industry.

Participants will also have gained knowledge of crude oil properties and fuel product specifications; and the environmental pressures on the oil industry; the results of these pressures on fuel specifications; and the changes demanded of the oil industry

**WHO SHOULD ATTEND**

This program is designed for those who have refinery-operating experience or who are involved in supporting operations. New refinery engineers, product sales personnel, fuel buyers, oil-traders, those involved in economic assessment of refining operations or financial analysis of sales / refining. In addition personnel concerned with the sale of equipment, chemicals, supplies, or services to the refining industry should benefit from this course.

Experienced operating personnel and engineering staff should find a great deal of beneficial information, particularly if they have worked in only one area of the refinery and have the need to gain an overview of refining operations

DMCT/OL/9/18(Rev3Dt:23/9/18)

**TRAINING METHODOLOGY:**

A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the most relevant questions, and motivate everybody find the right answers. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

Very useful Course Materials will be given.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Group Work & Practical Exercises
- 20% Videos & General Discussions

**COURSE OUTLINE**

**DAY 1**

Introduction  
The Origins of Petroleum  
Crude oil Assay and its properties  
Crude oil products  
Effect on refinery operations  
Refinery Terminology  
Overview of the petroleum industry

**DAY 2**

Description of petroleum refining processes and related health and safety considerations  
Simple and complex refineries  
Refinery flow sheet signs and symbols  
Crude oil processing  
Desalting  
Atmospheric distillation  
Vacuum distillation

- Distillation - pressure, steam
- Hydro treating Hydrodesulphurization

**DAY 3**

Catalytic cracking  
Platforming  
Visbraking  
Hydrocracking  
Alkylation  
Bitumen blowing Gas Treating

**DAY 4**

Product Slate – Now and Future:  
Products and specifications  
Gasoline  
Kerosene/Jet Fuel

[www.definettraining.com](http://www.definettraining.com)

DMCT/OL/9/18(Rev3Dt:23/9/18)

Fuel Oil/Diesel Fuels  
Petrochemical Feedstocks  
Alternative Fuels  
Effects of Environmental concerns on oil product specifications  
Gasoline & Lead phase out  
Reformulated Gasoline  
Blending of products

**DAY 5**

Tanks and Storage  
Product Transfer  
Utilities

**NOTE:**

- Pre & Post Tests will be conducted
- Case Studies, Group Exercises, Group Discussions, Last Day Review & Assessments will be carried out.
