

TRAINING TITLE

REFINING PROCESSES AND PETROLEUM PRODUCTS

TRAINING DURATION

5 days

TRAINING VENUE AND DATES

REF RT011	Refining Processes and Petroleum Products	5 days	04-08 March	\$6,500	London, UK
--------------	--	--------	-------------	---------	------------

In any of the 5 star hotel. Exact venue will be informed later.

TRAINING FEES

6,500 US\$ per participant includes Training Materials/Handouts, Tea/Coffee breaks, Refreshments and International Buffet Lunch.

TRAINING CERTIFICATE

DEFINÉ Management Consultancy & Training Certificate of course completion will be issued to all attendees.

TRAINING INTRODUCTION

The training focuses on the core refining processes of fluid catalytic cracking, alkylation, hydrotreating, hydrocracking, and catalytic reforming, although all major processes are covered in detail. The speakers will discuss feedstock properties, process chemistry, process variables, operating conditions, unit configuration, and refinery products. The interaction between yields, operating variables, and product variables will also be covered. In addition, the basic economics associated with petroleum refining and the impact of recent environmental regulations will be discussed. These program sessions will be presented by petroleum industry professionals who have extensive experience in all of the major processing areas in petroleum refining.

TRAINING OBJECTIVES

Upon completion of this course, participants will have an understanding of the overall process operation of an integrated petroleum refinery and the extensive vocabulary unique to this industry.

Participants will also have gained knowledge of crude oil properties and fuel product specifications; and the environmental pressures on the oil industry; the results of these pressures on fuel specifications; and the changes demanded of the oil industry

WHO SHOULD ATTEND

This program is designed for those who have refinery-operating experience or who are involved in supporting operations. New refinery engineers, product sales personnel, fuel buyers, oil-traders, those involved in economic assessment of refining operations or financial analysis of sales / refining. In addition personnel concerned with the sale of equipment, chemicals, supplies, or services to the refining industry should benefit from this course.

Experienced operating personnel and engineering staff should find a great deal of beneficial information, particularly if they have worked in only one area of the refinery and have the need to gain an overview of refining operations.

DMCT/OL/9/18(Rev3Dt:23/9/18)

TRAINING METHODOLOGY:

A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the most relevant questions, and motivate everybody find the right answers. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

Very useful Course Materials will be given.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Group Work & Practical Exercises
- 20% Videos & General Discussions

COURSE OUTLINE

DAY 1

Introduction
The Origins of Petroleum
Crude oil Assay and its properties
Crude oil products
Effect on refinery operations
Refinery Terminology
Overview of the petroleum industry

DAY 2

Description of petroleum refining processes and related health and safety considerations
Simple and complex refineries
Refinery flow sheet signs and symbols
Crude oil processing
Desalting
Atmospheric distillation
Vacuum distillation

- Distillation - pressure, steam
- Hydro treating Hydrodesulphurization

DAY 3

Catalytic cracking
Platforming
Visbraking
Hydrocracking
Alkylation
Bitumen blowing Gas Treating

DAY 4

Product Slate – Now and Future:
Products and specifications
Gasoline
Kerosene/Jet Fuel

www.definettraining.com

DMCT/OL/9/18(Rev3Dt:23/9/18)

P.O BOX 45304
ABU DHABI, U.A.E

T +971 2 6264455
F +971 2 6275344

www.definettraining.com

Fuel Oil/Diesel Fuels
Petrochemical Feedstocks
Alternative Fuels
Effects of Environmental concerns on oil product specifications
Gasoline & Lead phase out
Reformulated Gasoline
Blending of products

DAY 5

Tanks and Storage
Product Transfer
Utilities

NOTE:

- Pre & Post Tests will be conducted
- Case Studies, Group Exercises, Group Discussions, Last Day Review & Assessments will be carried out.
