Training Certificate

Define Management Consultancy & Training Certificate of course completion will be issued to all attendees.

TRAINING DESCRIPTION

This course provides participants with a comprehensive understanding of risk management, with a focus on identifying, assessing, mitigating, and preventing risks in various organizational and project contexts. Through real-world case studies, risk analysis tools, and strategic frameworks, students will learn how to develop proactive strategies to minimize exposure to threats and ensure organizational resilience.

OBJECTIVES

By the end of this course, participants will be able to:

- Understand the principles and lifecycle of risk management.
- Identify and assess risks across different domains.
- Develop and implement mitigation strategies.
- Use risk assessment tools and models (e.g., SWOT, PESTLE, FMEA).
- Integrate prevention into organizational policies and culture.
- Monitor and revise risk strategies in response to evolving threats.

WHO SHOULD ATTEND?

- Project managers
- Business continuity professionals

DMCT/OL/9/18(Rev3Dt:23/9/18)

- Safety officers
- Risk analysts
- Executives and decision-makers

TRAINING METHODOLOGY:

A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the most relevant questions, and motivate everybody find the right answers. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course. Very useful Course Materials will be given.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Group Work & Practical Exercises
- 20% Videos & General Discussions
